17 June 2010

### **UGL secures \$280 million in new resources projects and reaffirms guidance**

**Sydney:** UGL Limited (ASX: UGL) (“UGL”) today announced that it has secured new works and project extensions with a range of blue chip customers in the resources, oil and gas and chemicals sectors. These works have a total end value of approximately \$280 million, evenly distributed between new works and project extensions. Some of the contracts include:

- A new facilities maintenance project with Anglo Coal at its German Creek Mine in Queensland;
- A new EPCM and shutdown project (Phase 1) for a major oil and gas customer in Victoria;
- A new maintenance turnaround agreement at Orica’s Kooragang Island ammonium nitrate plant in New South Wales;
- A new coal handling preparation plant maintenance project for Wesfarmers Curragh mine in Queensland;
- A new three year mechanical and electrical maintenance agreement for BHP Billiton Mitsubishi Alliance (BMA) Blackwater mine in Queensland; and
- A three year extension for maintenance and minor capital works at Incitec Pivot’s Phosphate Hill facility in Queensland.

UGL’s Managing Director and CEO, Richard Leupen, said: “Our resources business continues to secure a wide range of new projects as well as retaining our existing client base. We have again been successful in winning a large number of new maintenance style projects and contract extensions. This further strengthens and extends our recurring revenue streams.

“These new projects and extensions demonstrate the strength through diversity within our resources business across a variety of blue chip clients, services and geographies.”

Mr Leupen added: “We are encouraged by the momentum across all of our businesses, and UGL has an active pipeline of near term tendering opportunities that we are actively pursuing in the oil and gas, infrastructure, property services and transport sectors.”

UGL also remains on track to deliver on its previously stated full year 2009/10 earnings guidance, which is for profit to be in line with the prior record year.

### ***Ends***
