

ASX/MEDIA RELEASE - DRAFT

29 November 2011

UGL awarded \$200 million in new resources contracts

Sydney: UGL Limited (ASX: UGL) today announced that it has successfully secured approximately \$200 million in new contract wins and extensions with various blue-chip clients across the coal, oil and gas and iron ore industries. Key contract highlights include:

- A new contract with CP Mining at the Sino Steel plant in the Pilbara for the construction/installation of the second stage of the 50GL desalination facility;
- A renewal of the maintenance contract at BHP Billiton's Olympic Dam operation in South Australia;
- A renewal of the management and execution of a CDU turnaround at Caltex Kurnell; and
- A new contract for an electrical upgrade and new PCR installation on a Stanwell Corporation dragline at the Meandu Mine in Queensland.

UGL's Managing Director and CEO, Richard Leupen, said: "Recurring asset services revenue represents nearly 70 per cent of the revenue generated from our Resources business. The strong momentum of contract wins in this segment is consistent with UGL's strategy of maintaining and growing our stable base of recurring revenues, generated from providing essential services to a diversified portfolio of blue-chip customers."

Mr Leupen added: "The outlook for the Resources business remains healthy with an estimated \$11 billion pipeline of tendering opportunities identified. We are seeing an increasingly active bidding and enquiry pipeline across the iron ore, coal, oil and gas and minerals processing sectors which is anticipated to support our growth outlook within the business."
