## UGL secures new contract to provide services to Woodside's Karratha Gas Plant Life Extension Program

**Sydney:** UGL Limited (ASX: UGL) today announced that it has secured a new contract, in 50/50 joint venture with Cape plc (Cape), for services on the Woodside operated Karratha Gas Plant Life Extension Program. The contract is for a two year period with work expected to commence on site at the beginning of 2016.

The UGL and Cape joint venture will provide a range of services to the Life Extension Program including the detailed planning and execution of access, fire protection application, blasting and painting, cladding and insulation, mechanical and electrical services.

Located 1,260 kilometres north of Perth, Western Australia and covering approximately 200 hectares, the Karratha Gas Plant includes five LNG processing trains, two domestic gas trains, six condensate stabilisation units, three LPG fractionation units as well as storage and loading facilities for LNG, LPG and condensate. The plant has the capacity to produce 12,000 tonnes of domestic gas per day.

UGL's CEO, Ross Taylor said: "Securing this contract further consolidates UGL's position as Australia's leading LNG maintenance services provider, positioning us strongly for future maintenance opportunities in this sector as LNG facilities currently under construction move to their operational phase.

"When combined with our existing LNG maintenance services contracts, our scale in the LNG maintenance sector provides us with a flexible workforce with the capacity and capability to support a near permanent shut down crew; a key value proposition for our customers.

"We are very pleased to have secured this new opportunity with Woodside and we look forward to working closely with them as well as our partner Cape, to deliver safe and innovative services on this extensive project."
